Open to remote & relocation

EXPERIENCE

ONESPAN (FORMERLY BUILD38)

Barcelona, Spain

Junior Software Engineer

Oct 2024 – Present

- Develop Digipass One Protect, a mobile RASP SDK in C/C++ (runtime threat detection, cryptography, secure TLS) with a companion backend for visibility, remote enable/disable of checks, and certificate updates; ship Kotlin, Swift, Flutter, and Ionic wrappers for customer apps.
- Plan and implement roadmap features such as detection of accessibility services and untrusted keyboards, from design through delivery with the team.
- Automate release workflows with Jenkins and AWS Bedrock, including changelog generation and automated updates to SDK wrappers.
- Extend Jenkins CI/CD (new and existing pipelines), including SDK size and performance reporting to Grafana.

Solutions Engineer Intern

Feb 2024 – Sep 2024

- Integrated the cybersecurity SDK into customer Android and iOS applications.
- Designed and built an end-to-end code obfuscator (Gradle + JVM) to harden client applications against reverse engineering.

EDUCATION

U. POLITÈCNICA DE CATALUNYA | Master's in Informatics Engineering

Sep 2024 – Present

- Expected Oct 2026 · Grade: 8.77 / 10 (as of Jun 2026)
- Thesis (in progress): Interactive Trail Erosion Editor

U. POLITÈCNICA DE CATALUNYA | Bachelor's in Informatics Engineering

Sep 2020 – Jun 2024

- Specialization in Computing · Grade: 8.26 / 10
- Thesis: Creation of a 3D Photo Viewer — Matrícula d'Honor (highest distinction, 10/10); basis of the CEIG 2025 publication

AALTO UNIVERSITY | Exchange, Computer Science

Aug 2023 – Dec 2023

- Exchange semester · Grade: 4.8 / 5

SKILLS

Languages C, C++, Java, Kotlin, Swift, Python

Mobile & tools Android, iOS, Flutter, Ionic, Jenkins, AWS, Grafana

Spoken Catalan (native), Spanish (native), English (advanced), French (intermediate)
